

CONNECT INTERFACE

smartGAS item number: Z6-000006

Digital interface compatible to all smartGAS EVO – sensors:

BASIC^{EVO}
FLOW^{EVO}

The CONNECT INTERFACE electronic offers a simple solution for connecting smartGAS EVO - sensors in various applications using standardized interfaces. Thanks to the analogue outputs (e.g. 4-20mA, 0-10V) or the RS485 Modbus interfaces of the CONNECT INTERFACE all smartGAS sensors can be directly connected to a variety of process control analyzing systems.

The integrated pressure compensation provides a better precision in measurement and the on-board LED indicate the sensor status for easy handling.

- **Integrated ambient pressure compensation**
- **Internal pressure compensation (800 to 1150 mbar)**
- **Zero and Span calibration per jumper or software**
- **On board supply (6V DC) for peripheral equipment e.g. micro pump**
- **Operating status with 3 LED**
