## CLASS I VERTICAL HYDROCARBON SEPARATOR BY COALESCENCE WITH AUTOMATIC CLOSURE DEVICE (ACD) AND OIL FILTER

REF: CVC-SH-FO; CVC-SH-F; CVC-SH-O

## Application:

- Mineral oil, grease and hydrocarbon separation from water (gravity and coalescing separation) by density difference. This unit does not separate emulsified oil.

NOTE: For organic oil and grease removal (from vegetables and animals), please refer to grease separators (chapter n ${ }^{\circ} 1$ ).

## Characteristics:

- Salher brand, model CVC-SH-FO (with filter and self-locking system); CVC-SHF (with filter). Class I, outlet oil concentration smaller than 5 ppm.
- Manufactured by Salher, model CVC-SH-O (with self-locking system). Class II, outlet oil concentration smaller than 100 ppm .
- Designed according to DIN 1999 and UNE 858 Standards.
- Manufactured in Glass Fiber Reinforced Polyester (GFRP) with orthophthalic resins.
- Oil and hydrocarbon separation and solids settling chamber.
- Separated oil and hydrocarbon on the surface of water.
- Oil filter and automatic closure device composed of a float and closing system.
- Oil removal through upper manhole.
- PVC inlet and outlet pipes. Outlet in the manhole to install a ventilation pipe.
- Optional: oil and hydrocarbon detection alarm.
