

HMI

Brilliant Displays of Processing Sequences

With its MI4 and MV4 operator and display units, Moeller offers you a product range for Man/machine communication that allows you to implement solutions quickly and in the optimum fashion. The offering includes units from graphics-capable Text Operator panels with 4 x 20 characters and 11 keys, up to 15" TFT Touch Operator panels with a resolution of 1024 x 768 pixels.

With the Touch Operator panels you have a choice between devices with analog resistive (MI4 series) or infrared touch technology (MV4 series).

When equipped with a communication module, these operator and display units become bus-capable and can be connected via CANopen, PROFIBUS-DP, Suconet, MPI, DeviceNet and many other protocols.

Product description

The MV4 series consists of touch operator panels based on infra-red technology. The spectrum ranges from a monochrom 5.7" STN display with a resolution of 320 × 240 pixels up to a color 15" TFT display with a resolution of 1024 × 768. All units have full graphics capability, with 256 colors/grey levels. All units feature a real glass front panel that is highly robust and resistant to scratches and chemicals. All these devices can be project-programmed with the M14 configurator MI4-CFG.

Application

The MV4 touch operator panels have been designed for economical machine and system control. They offer various different displays, memory sizes and interfaces, depending on the information requirements and the task at hand.

Features

- Infra-red touch technology
- Non-reflective, scratchproof glass front
- Full graphics, 256 colors/grey levels
- Revers-polarity protected 24 V DC or 100 – 240 V AC supply connection
- IP65 degree of protection at front
- Brightness and contrast controls for the display
- Screen saver
- Touch deactivation
- Gateway function for MV4 units with 2 communication modules
- Bar graph and trend diagrams
- Up to 100 trend diagrams (32 curves per diagram) with time axis
- Zoom function for trend diagrams
- Standard keypads and user-defined keypads can be displayed
- Error/history memory
- Recipe management (up to 5 MB recipe memory)
- Password management (200 levels, 500 users)
- Up to 100 project languages
- Real-time clock
- Synchronize the PLC clock
- Serial printer interface
- Parallel interface (600 series)
- Ethernet interface (600 series)

Engineering

Manufacturer-specific function blocks support the connection of MV4 units to Moeller PLC systems. A function block is also available for communication with Siemens PLC systems (S7-300/S7-400 via PROFIBUS-DP), which can be downloaded from the Internet free of charge, in the form of an Application Note. For communication with Allen-Bradley PLC systems via DeviceNet, there is another function block available as an Application Note that can be downloaded from the Internet free of charge. No function block is necessary for communication with Siemens PLC systems via MPI. The connection via PROFIBUS-DP and the Siemens MPI interface is made with the cable ZB4-900-DS2 and the corresponding plug ZB4-209-DS2. Communication modules and PCMCIA cards must be ordered separately. A demo version of the MV4 configurator can be downloaded from the Internet.

Communication/networking

All MV4 units can be connected to Moeller PLC systems through the PROG PORT/SYSTEM PORT interface, using SUCOM-A. The communication cards ZB4-601-IF1, ZB4-609-IF1, ZB4-604-IF1, ZB4-606-IF1 and ZB4-607-IF1 allow the MV4 units to be connected to a very wide range of control systems. MV4 units in the 600 series are also fitted with an Ethernet interface. The Ethernet interface can be used for uploads and downloads of projects, recipes and password data. In addition, graphics data (trend data) can be loaded into the PC from the MV4.

Programming

With the MV4 configurator MV4-CFG-1 (Galileo).

Documentation

Documentation in the form of PDF files in English and German is included in the M14 configurator MI4-CFG-1.

Application

The configuration software MI4-CFG-1 (Galileo) is used for the creation of application forms for all MV4 devices, and runs under Windows 98SE, ME, NT, 2000, XP. The software is supplied on CD-ROM together with German and English documentation in PDF format.

Features

- Online project simulation on the PC
- User-definable printout forms with any variables
- Context-sensitive Help – 100% identical to documentation
- Error/history memory
- Recipe management
- Password management (200 levels, 500 users)
- Design tool for creating and managing 100 project languages
- 100 trend diagrams (32 curves per diagram) with time axis
- Zoom function in trend diagrams (in X, Y axes)
- Character sets: Roman, Cyrillic, Greek, Hebrew, Hiragana/Katakana
- Scaling of variable tags
- Dynamic limit values
- Value conversion and unit of measure conversion
- Standard keypads and user-defined keypads
- Drawing editor (line, rectangle, ellipse, polygon, text, bitmap)
- Import of 15 different graphic formats (.bmp, .tif, .jpg, .gif, ... etc.)
- Real-time clock (synchronisation with PLC clock)
- Parameter list, Script language
- Script functions (cyclic and event-controlled)

System requirements

- IBM PC or compatible systems
- Windows 98SE, ME, NT, 2000, XP
- 50 MByte hard disk memory
- Recommended resolution XGA (at least SVGA)
- Pentium processor
- 32 MB RAM working memory
- CD-ROM drive
- PCMCIA drive (for MV4-5... and MV4-6... project programming)
