Inclination Sensor - ABS-housing (Figure similar)

The inclination sensor ISXP0xx-z-EL is available with a current loop or voltage interface. It enables the two-channel measurement of inclinations in the angle range (xx) of  $\pm 10^\circ$ ,  $\pm 45^\circ$  and  $\pm 60^\circ$ . The full-scale readings are factory calibrated at 25 °C.

The compact and robust design makes the sensor a suitable angle measurement device in rough surroundings for different applications in industry and automotive technology.

### Applications:

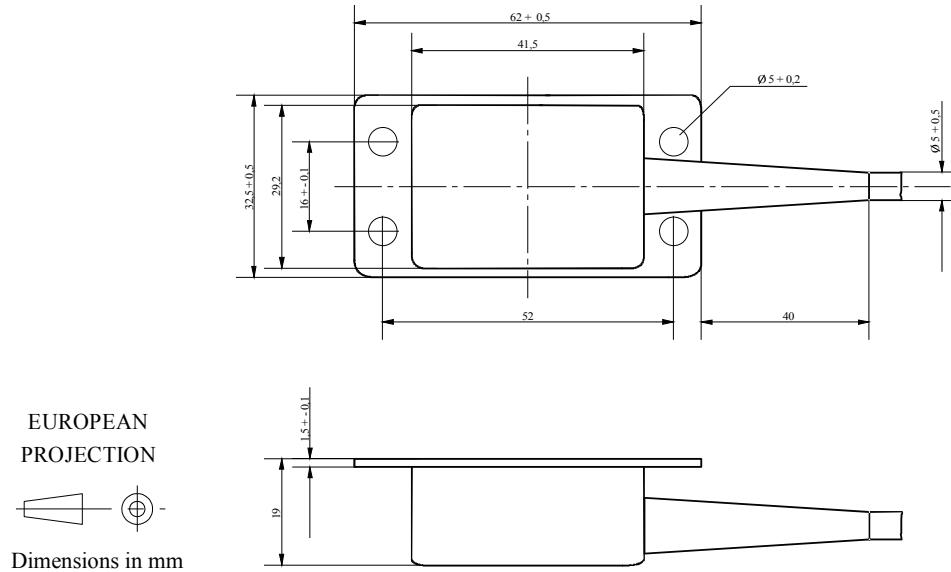

- Agricultural and forestry machines
- Solar tracking systems
- Utility vehicles
- Crane and hoisting technology
- Industrial automation
