

The 100X series is an open-loop, highly accurate current – pressure Converter.

A rugged and reliable unit which has been proven in application installations globally.

The uncomplicated design of the 100X/101X enhances the reliability and reduces maintenance requirements, offering a cost effective accurate solution.

- *Reliable, rugged, open loop control*
- *ATEX and FM certified units are available as Intrinsically Safe, Type N*
- *Proportional I/P and E/P converters*
- *Minimum Vibration Effects*
- *IP65 environmental protection*
- *Mounting Bracket and Connector Included*

TYPICAL APPLICATIONS

Solution:

The proportional valve/ I/P provides accuracy and is robust for different applied loads and conditions.

It can also be used to raise and lower objects to preset positions.

Industry :

Any industry using I/P Converters for positioning valves or electrical regulation for pressure control.

e.g. Petrochemical, Oil and Gas and also Tyre manufacturing etc.

TECHNICAL DATA

Pneumatic

- Output Pressure Ranges up to 4bar (2 wire), up to 8bar (3 wire) – **See Ordering Options**
- Air Supply Oil free, dry air, filtered to 5 microns; at least 0.5bar above maximum required output pressure; maximum 5bar for a standard 100X (upto 10bar for 101X)
- Flow Capacity Up to 300nL/min (10scfm) forward flow, 150nL/min (5scfm) relief
- Air Consumption 1.4 l/min (0.06scfm) typical
- Linearity Maximum 0.5% of span for 100X
- Hysteresis Maximum 0.35% of span for 100X
- Response Time Typically less than 0.5 seconds (dependent on input for 10-90% step change in outlet pressures) into a 10cc load
- Temperature Sensitivity < 0.1% span/°C for span and zero over operating range
- Supply Sensitivity Better than 0.075% span output change per % supply pressure change
- Port Sizes 1/4" NPT or 1/4" BSP

Physical

- Operating Temperature -40°C to +85°C
- I.P. Rating IP65 in normal operation
- Electromagnetic Compatibility This is a passive electro-pneumatic instrument and is unaffected by interfering high frequency signals
- Material of Construction Zinc diecasting passivated and epoxy paint, nitrile diaphragms, Be₂Cu flapper nozzle & supply valve
- Weight 825g
- Mounting Position Integral surface mounting bracket provided for preferred vertical mounting.
Alternative mounting available.
- Vibration Effect <5% of span : 4mm_{p-p} 5-15Hz & 2g sine 15-150Hz, vertical, horizontal & inverted, in accordance with ISA-S75.13-1996

Electrical

- Input Signal 4-20mA/1-10V (2 & 3 wire) – **See Ordering Options**
- Failure Mode Output pressure falls to bleed pressure when electrical supply fails
- Connections 30mm square connector DIN 43650
- Span/Zero Adjustable 20% output range – **Further Options Available**
- Input Impedance 11kohms for a 0-10V
Current required from the voltage source (0-10V) would be 10/11000 = 0.9mA

INSTALLATION DIAGRAM

Pneumatic connections:
1/4" NPT or 1/4" BSP Female

Electrical connections:
30mm square connector
DIN 43650 (provided)

CHARACTERISTIC GRAPHS

Type 100X Forward Flow Capacity at 12mA, 1.3, 2 and 4 bar Supply Pressure

ORDERING INFORMATION & ACCESSORIES

Standard models are 2 wire; 3 wire units require 12-24V supply

| OUTPUT PRESSURE | INPUT SIGNAL | |
|--------------------|--------------|---------|
| | 4-20mA | 1-10V |
| 0.2-1bar | 402100R | - |
| 0.14-8bar (3 wire) | 572400R | 562400R |
| 3-15psig | 400100R | 440100R |
| 2-120psig (3 wire) | 570400R | 560400R |

Options available:

- Alternative input signal ranges
- Alternative pressure ranges
- Flying Leads
- Conduit entry with flying leads
- Junction box (M20 / 1/2" NPT)
- Intrinsically safe certification
- 50mm pipe mounting bracket
- Captured exhaust
- Reverse acting
- Split range
- Weatherproof (IP66)

CERTIFICATION

An intrinsically safe 100X model is certified to ATEX 94/9/EC,  II 1G EEx ia IIC T4 (Ta= -40°C to +80°C) (EN 50020) is available. (Installations with these models must comply with the information given in BS EN 60079.

All instruments are tested, soaked at 60°C, cycled for 1000 full scale electrical /pneumatic operations and retested on the Watson Smith Automatic Testing System for linearity, hysteresis, drift, supply sensitivity, response time, start up pressure, air consumption and terminal resistance. An individual test certificate is provided at no extra charge.

Our policy is one of continuous research and development. We therefore reserve the right to amend without notice the specifications given in this document. Customers are responsible for ensuring that the product is used only for the purpose for which it is intended. In case of doubt Norgren will be pleased to advise.
