**COMPACT PURIFICATION PLANT FOR ABOVE-GROUND WATER WITH HIGH TURBIDITY**  
REF: PUR- FQLF

**PRETREATMENT F-Q + LAMELLAR SETTLING+ FEEDING PUMP + MULTILAYER FILTER + DISINFECTION CL**  
ABOVE-GROUND INSTALLATION AND AUTOMATIC CLEANING SYSTEM

**Function:**

- Removal of suspended solids, organic matter, turbidity and microorganisms and reduction of contaminants (Fe, Mn...).
- Treatment of low quality water, usually surface water issued from rivers, lakes and tanks.
- Characteristics of the inlet water:
  - Concentration of suspended solids and turbidity:  
TSS < 1000 mg/l; Turbidity < 500 NTU
  - Concentration of dissolved solids: TDS < 1500 mg/l
  - Concentration of contaminants below the acceptable threshold.

**Characteristics:**

- Compact equipment for water purification in accordance with the Regulation R.D. 140/2003 and recommendations of the World Health Organization (WHO).
- Purification system, Salher brand, with possibility of mounting on carbon steel structure, composed of the following elements, according to the final use:
  - Pre-chlorination composed of dosing pumps regulated by the frequency of impulses, proportional to the flow controlled by an impulse issuer counter.
  - Support of filtration through dosage of coagulant, flocculants and pH corrector. Composed of dosing pumps, reactive tanks, level probes and accessories.
  - Lamellar settling tank composed of GFRP rectangular tank and lamellar modules with slope of 60°, with adjustable canal, overflow and inlet, outlet and emptying intakes.
  - High efficiency filter in GFRP (Glass Fiber reinforced Polyester), with automatic cleaning system, provided with silex and anthracite filling material, with grain sizes selected according to final use.
  - Ring filter with different filtering degrees, according to final use.
  - Feeding system to filtration treatment composed of centrifuge pumps provided with regulation system and flow control, level regulators, etc.
  - System of water quality control on tank composed of suction recirculation pump, provided with regulation system and automatic chlorination station.
  - Electrical panel board for control and command of the treatment.
  - Set of accessories composed of interconnecting pipes between pieces of equipment, valves, sampling intakes, regulation and control systems, etc.

**OBSERVACIONES**

*Plazos de entrega expresados en días laborables y a partir de la conformidad por nuestra parte del pedido.  
Las condiciones generales de venta de Salher, están a disposición de nuestros clientes, en caso de duda.  
En las primeras ventas, el plazo de entrega estará supeditado a la petición de informes bancarios salvo en operaciones de contado.*

Decantadores y Espesadores en PRFV*

- GFRP STRUCTURE-SKID with hydraulic and electrical interconnection of the elements.

**Options:**

- Alternatives to the silex-anthracite multi-layer filter:
  - Filtration through zeolite. Ref.: PUR-FQLF-Z (CONSULT)
  - Filtration with active glass. Ref.: PUR-FQLF-V (CONSULT)
- Raw water tank. Enables the separation of the functioning of the water feeding plant.
- Treated water storage tank.
- Alternative system of disinfection of treated water.
